

Tuesday - Wednesday, March 29-30, 2011

Walter Washington Convention Center

Goal is to provide valuable insights into key issues involving the protection of our nation through in-depth conference sessions and keynote addresses. Many events are invitation-only. Some subject matter that will be covered includes:

## **Critical Infra-structure Protection**

Critical infrastructure and key resource protection techniques.

## **Cyberterrorism and Cybercrime Protection**

Cyberterrorism and cybercrime issues and effectively combatting them

## **Domestic and International Terrorism**

Preparing for terrorism within the US borders and security involving the most common threats.

## **Case Studies, Tactics and Techniques for Law Enforcement**

Law enforcement actions and methods case studies.
